

## COVID-19 INFECTION REPORTING

There are a growing number of COVID-19 cases on North American campuses. No group of students is immune from the reach of this novel virus. Sigma Alpha Mu has prepared this resource to prepare chapter facilities and fratres in the event that one or more of its members has been infected or exposed.

### REPORTING

Be a good community citizen:

- 👉 **Headquarters** | Our team will review COVID-19 isolation and quarantine protocols with your chapter leadership.
- 👉 **University** | The university may have access to testing and may be able to help get access to isolation spaces on campus if needed.
- 👉 **Department of Health** | Departments of Health may have access to testing, especially for those in group housing.

### MY CHAPTER IS EXPERIENCING THIS RIGHT NOW. WHAT SHOULD WE DO?

- 👉 First, **isolate infected members** and notify headquarters, university, and local department of health contacts. Isolation and quarantine standard operating procedures are documented in SOP #4 on [sam.org/covid19](http://sam.org/covid19). The impacted residence of an infected member should be under quarantine for at least 14 days.
- 👉 Second, briefly **alert chapter members and your advisors** to the situation. Headquarters staff can assist with that messaging. Clearly state key procedures for isolation, quarantine, and items that may be of specific concern to members. Don't assume that everyone is aware.
- 👉 Third, **assign a non-infected health and wellness coordinator**. Every chapter should have a point person to help reinforce guidance in SOP #4, coordinate cleaning protocols, provide access to food, and drink.
- 👉 Fourth, clarify that the **Chapter Prior shall be the chapter's sole spokesman** and that more information will be available once a response plan based on local facilities, food service, and other factors are in place.
